Q3: I submitted a request but haven't received any status update.	14
Q4: The Admin Dashboard is showing outdated information.	14
Q5: An approver sees an "Access Denied" message on the HOD Portal.	14
Q6: Can I attach more than one document to my requisition?	14
10. Glossary of Terms	15

1. Introduction

TrainHub is the company's digital system for planning, approving, running and evaluating employee training programmes. It replaces paper-based training request forms and spreadsheets with a connected set of online portals that guide a training request from the moment it is submitted through to its final 3-month effectiveness review.

This manual explains, step by step, how to use TrainHub in your day-to-day work — whether you are an employee requesting training, a manager reviewing and approving requests, an HR/Admin user running programmes and generating reports, or a participant checking in and completing evaluations.

1.1 What TrainHub Does

- Lets employees submit a Training Requisition Form (AP-HRD-F01-01) online, with their details pre-filled from the company directory.
- Automatically routes each request through the correct approval chain — Head of Department, C-Suite Executive, and Head of HR — based on the requester's department.
- Creates a dedicated, organised folder in Google Drive for every approved training programme, containing the signed requisition form and a private data sheet.
- Generates a QR code for each training session so participants can check in on their phones without a company login.
- Collects participant feedback immediately after training and follow-up supervisor reviews three months later.
- Produces ready-to-use reports and Excel exports — Annual Training Plans, training hours by department, cost breakdowns, and individual employee training records.

1.2 The Four Portals

TrainHub is made up of four connected web applications. You will only use the ones relevant to your role, and TrainHub will usually send you a direct link by email so you rarely need to remember web addresses.

Portal	Who Uses It	Main Purpose
Employee Requisition Portal	All employees	Submit and track training requests
HOD / Managerial Review Portal	HOD, C-Suite, HOHR, Supervisors	Approve, reject, or reschedule requests; complete 3-month reviews
Admin System	HR / Training Administrators	Create programmes, manage sessions, track attendance, generate reports
Public Participant Portal	Training participants	QR check-in and evaluation forms — no login required

Note: Access links for each portal are provided by your HR/IT department. Bookmark the ones you use regularly.

2. User Roles Overview

TrainHub recognises several roles. Your role determines which portal you use and what actions are available to you. A single person can hold more than one role — for example, a manager may also be a training participant.

Employee

Any staff member who wishes to attend training. Employees submit requests through the Requisition Portal and can track the status of their own submissions at any time.

Approver (HOD / C-Suite / HOHR)

Reviews and decides on training requests in sequence. TrainHub automatically identifies who the current approver is for each request based on the company's reporting structure, so you will only see requests waiting for your decision.

HR / Training Administrator

Manages the full lifecycle of a training programme once it is approved: creating sessions, generating attendance QR codes, monitoring attendance, reviewing evaluation results, and producing reports.

Participant

A person enrolled in a specific training session. Participants use the Public Participant Portal on their own phone to check in and to complete their post-training evaluation.

Direct Supervisor

Three months after a participant completes training, their direct supervisor is asked to assess how the training has affected the participant's on-the-job performance.

3. Getting Started

3.1 Accessing TrainHub

1. Open the web link for the portal you need (sent by HR/IT, or bookmarked from a previous session).
2. If the portal requires a company login (Requisition Portal, HOD Portal, Admin System), sign in with your company Google account when prompted.
3. The Public Participant Portal does not require any login — simply open the link or scan the QR code provided at your training session.

Note: Only accounts using the official company email domain can access the Requisition, HOD, and Admin portals. If you see an access-denied message, confirm you are signed in with your work account, not a personal Google account.

3.2 Browser & Device Tips

- All portals work in any modern web browser (Chrome, Edge, Safari) on desktop, tablet, or mobile.
- The Public Participant Portal is optimised for smartphones, since it is normally reached by scanning a QR code at the training venue.
- If a page does not load correctly, refresh the browser or clear the browser cache before contacting IT support.

4. Employee Guide — Submitting a Training Request

This section is for any employee who wants to request approval to attend a training programme.

4.1 Submitting a New Requisition

1. Open the Employee Requisition Portal link.
2. Enter your Employee ID. Your name, department/cost centre, and job position will be filled in automatically from the company directory.
3. Fill in the training details: training title, dates, duration, venue, training provider/trainer, course fee, and the objectives or reasons for attending.
4. Add the participant(s) who will attend the training. You can add yourself and, where permitted, other colleagues to the same request.
5. Attach a course brochure or supporting document if one is available (optional but recommended).
6. Review all fields, then submit the form.
7. The system automatically emails your Head of Department (or the next relevant approver) with a direct review link. You do not need to notify anyone manually.

4.2 Tracking Your Requests

Use the "My Requests" section of the Requisition Portal to see every request you have submitted and its current status, for example Pending HOD Approval, Pending C-Suite Approval, Pending HOHR Approval, Approved, Rejected, or Returned.

4.3 If Your Request Is Returned

An approver may return your request for revision instead of rejecting it outright — for example, if information is missing or a date needs adjusting. When this happens:

- You will receive an email explaining why the request was returned, along with any remarks from the approver.
- Open "My Requests", locate the request marked Pending Revision, and edit the details.
- Resubmitting the form restarts the approval chain from the beginning.

4.4 Approval Stages at a Glance

Stage	Reviewer	What Happens
1	Head of Department (HOD)	Verifies the request is justified for the department
2	C-Suite Executive	Approves from a divisional/operational perspective
3	Head of HR (HOHR)	Confirms budget and compliance
4	HR Administrator	Acknowledges the request, unlocking scheduling

Note: If one person holds more than one of these roles (for example, the requester is also the HOD, or the HOD is also the C-Suite executive for that division), TrainHub automatically skips the duplicated approval step so requests are not held up unnecessarily.

5. Approver Guide — Reviewing Training Requests

This section is for Heads of Department, C-Suite Executives, and the Head of HR, all of whom review requests through the HOD & Managerial Review Portal.

5.1 Opening a Request for Review

1. Click the review link in the notification email, or open the HOD Portal directly and sign in with your company account.
2. TrainHub verifies your identity against the company directory and shows only the requests currently waiting for your decision.
3. Scroll through the requisition to see the full training details and the list of participants.

5.2 Making a Decision

At the bottom of the review screen you will find the following decision buttons:

Action	Effect
Approve	Moves the request to the next approval stage (or to admin scheduling if you are the final approver). The requester and next approver are notified automatically.
Reject	Cancels the training request. The requester is notified with your remarks.
Return	Sends the request back to the employee for correction. Status changes to Pending Revision.
Reschedule	Lets you propose a new date while keeping the request in the approval chain.

Note: You can only act on a request while it is sitting at your specific stage. If a request has already moved on to the next approver, it will no longer appear in your queue.

5.3 The 3-Month Post-Training Evaluation

Three months after a participant completes a training programme, TrainHub opens a post evaluation window. As the direct supervisor or relevant approver, you will:

- Receive an email invitation, or open the 3-Month Evaluation section of the HOD Portal, which shows only the participants from your own department.
- Rate the participant's competency before and after the training, whether the skills are being applied on the job, and whether further training is recommended.
- Submit brief comments to complete the record. The system automatically updates the list of participants still awaiting evaluation.

6. Administrator Guide — Running the Admin System

This section is for HR and Training Administrators responsible for turning an approved request into a scheduled, monitored, and reported training programme.

6.1 Dashboard

The Dashboard is the home screen of the Admin System. It gives an at-a-glance view of key figures — active trainings, requests awaiting approval, upcoming sessions — so you can quickly see what needs attention.

6.2 Managing Training Programmes

1. Open the Training section to see all requisitions that have completed approval and are ready to be scheduled, alongside programmes already in progress.
2. Import the approved participant list from the requisition directly into the training programme.
3. Update programme details as needed (trainer, venue, dates) and monitor the lifecycle stage of each programme (see Section 8).

6.3 Creating Sessions & QR Codes

1. From a training programme, create one or more sessions with a date, start time, and end time.
2. The system automatically generates a unique QR code for each session, branded with the company logo.
3. Print or display the QR code at the training venue. Participants scan it with their own phones to check in — no company login is required on their end.
4. Once a session's scheduled end time has passed, its QR code automatically stops accepting new check-ins.

6.4 Monitoring Attendance

The Attendance section shows a live log of everyone who has checked in to a session, including the time they scanned in. If a correction is needed (for example, a participant who forgot to scan in), administrators can add or adjust an attendance record manually, and the change is logged with the editor's name and time.

6.5 Evaluations

The Evaluation section brings together the training feedback submitted by participants right after training, and the post evaluation supervisor reviews submitted three months later. Both feed into the reports described below.

6.6 Generating Reports

The Reports section produces the following outputs, viewable on-screen and exportable as Microsoft Excel (.xlsx) files saved automatically to the shared Reports folder in Google Drive:

Report	Shows
Annual Training Plan (ATP)	Every planned and completed training for the year, with dates, participants, and status
Training Hours Report	Training hours delivered by department, by month, for the whole year
Training Cost Breakdown	Itemised cost per training — fees, meals, allowances, accommodation, travel
Training Title Report	A master log of courses run, by trainer, hours, and department
Employee Training Record	An individual employee's full training history and evaluation scores

6.7 Employee Directory & Settings

The Employee section lets administrators look up staff records used throughout the system (name, department, position, email). The Settings section holds system-level configuration such as connected spreadsheets, folders, and notification addresses, and would normally only be changed by IT.

7. Participant Guide — Checking In & Evaluations

This section is for anyone attending a training session. No company login or app installation is needed — everything happens through your phone's web browser.

7.1 Checking In with the QR Code

1. At the start of the session, scan the QR code displayed by the trainer or administrator using your phone's camera.
2. Enter your Employee ID when prompted.
3. The system checks that you are enrolled in this training and shows your name to confirm the match, then records your check-in with a timestamp.
4. You cannot check in twice for the same session, and check-in is no longer accepted once the session's scheduled end time has passed.

Note: If check-in is rejected with a message that you are not enrolled, speak to the training administrator — you may need to be added to the participant list before you can check in.

7.2 Completing the Training Evaluation

Shortly after your training finishes, you will receive a link (or find one posted at the venue) to a short evaluation form covering course content, the instructor, the facility or platform, time allocation, and whether the learning objectives were met. Rate each item and add any open comments, then submit.

7.3 The 3-Month Follow-Up

About three months after your training, your direct supervisor will be asked to complete a short follow-up review assessing how the training has translated into on-the-job improvement. This step does not require any action from you personally.

8. Training Lifecycle Reference

Every approved training programme in TrainHub moves through the following stages in order. Knowing where a programme sits in this sequence helps explain what actions are currently available to administrators and approvers.

Stage	Meaning
Created	The requisition has been approved and a training record has been set up
Participants Imported	The approved participant list has been loaded into the programme
Attendance In Progress	A session is active and its QR code is accepting check-ins
Training Completed	The scheduled end date and time have passed
Evaluation Completed	Enough training participant evaluations have been submitted
Waiting for 3-Month Review	The 90-day countdown to the post evaluation supervisor review is running
Programme Closed	All post-training evaluations are complete and the record is archived

9. Frequently Asked Questions

Q1: I can't see any requests waiting for my approval.

This is expected if there is currently nothing sitting at your approval stage. Check with the requester on the status shown in "My Requests", or confirm with HR that your email is correctly listed as an approver for your department.

Q2: My QR check-in was rejected as "not enrolled".

Your Employee ID has not yet been added to that training's participant list. Contact the training administrator so they can add you before you try scanning again.

Q3: I submitted a request but haven't received any status update.

Check "My Requests" for the current stage. If it has been pending at the same stage for an unusually long time, follow up directly with the relevant approver — reminder emails cannot always guarantee prompt review.

Q4: The Admin Dashboard is showing outdated information.

Refresh the page. If the information is still incorrect, ask your system administrator to confirm the correct database is connected, as this is usually a configuration issue rather than something an end user can fix.

Q5: An approver sees an "Access Denied" message on the HOD Portal.

This means the signed-in Google account is not recognised as an approver in the company directory. HR/IT will need to confirm the approver's email is correctly listed against the right department.

Q6: Can I attach more than one document to my requisition?

The requisition form supports one primary brochure/attachment per request. For multiple supporting documents, combine them into a single file before uploading, or share additional files separately with your approver.

10. Glossary of Terms

Term	Meaning
AP-HRD-F01-01	The company's official Training Requisition Form template
HOD	Head of Department — the first-line approver for a training request
HOHR	Head of Human Resources — final approver before HR acknowledgment
Cost Centre	The department/budget code a training request or employee is associated with
Requisition	A submitted request to attend or run a training programme
Training Evaluation	The feedback form participants complete immediately after training
Post Evaluation	The supervisor review completed three months after training, assessing on-the-job impact
Lifecycle Stage	The current position of a training programme in its end-to-end process
QR Check-In	The phone-based, login-free attendance process used at training sessions

For questions not covered in this manual, please contact your HR or IT Department.
